

## ACTION PLAN NO. 5

# Fukushima Action Plan – Pioneering in Renewable Energy

## Action Plan

Based on the **“Fukushima Prefecture Renewable Energy Promotion Vision 2021”** formulated in December 2021, our action plan promotes a leap forward in renewable energy by sharing and implementing each of our current initiatives among all parties concerned.

## Our Goals

### Renewable Energy Introduction Targets

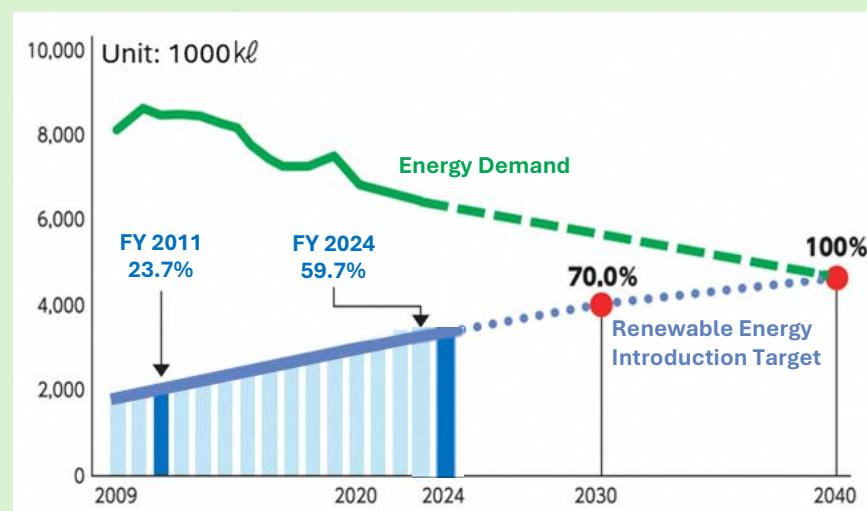

Targets for introducing renewable energy in relation to the prefecture's energy demand ➤ **FY 2024: 59.7%**

Promotion vision implementation target: FY 2030: 70%, around 2040: 100%

Increase in output of renewable energy in the prefecture (excluding large-scale hydroelectric power) (FY2022-2024) ➤ **+852 MW**

Targets for introducing renewable energy in relation to the prefecture's electricity demand ➤ **FY 2024: 103%**

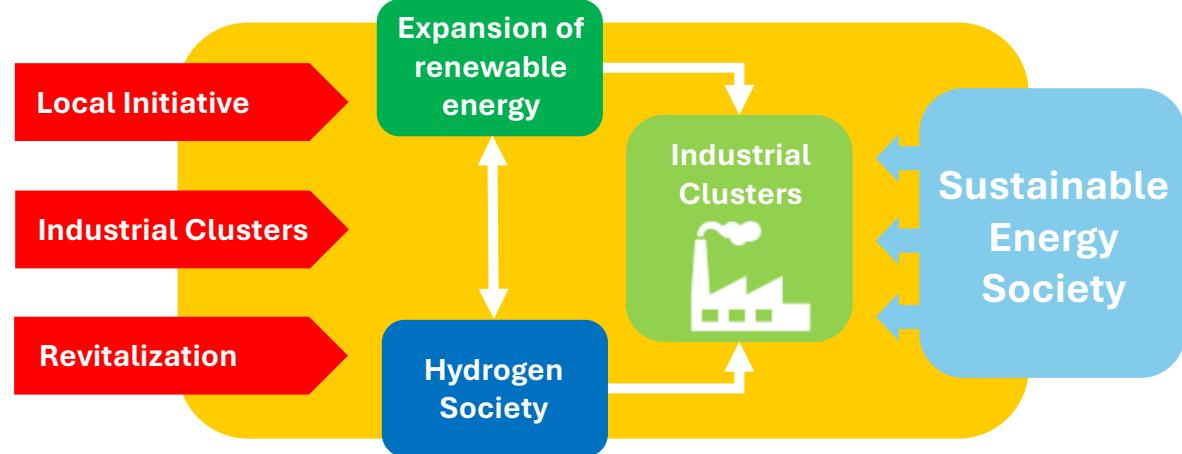

TARGETS FOR INTRODUCTION OF RENEWABLE ENERGY  
(in crude oil equivalent)

## Pillars We Build On

Our initiatives are organized into four pillars of action:

- ① Expansion of renewable energy introduction
- ② Accumulation of renewable energy-related industries
- ③ Realization of a hydrogen society
- ④ Building a sustainable energy society

**Our Principle of Revitalization:** Creating a safe, secure, and sustainable society that is not dependent on nuclear energy.
